1. The first part of the paper is devoted to a
discussion of the general principles of the
theory of the structure of the atom. It is
shown that the structure of the atom is
determined by the laws of quantum mechanics.
The second part of the paper is devoted to a
discussion of the experimental results of the
study of the structure of the atom. It is
shown that the experimental results are in
agreement with the theoretical predictions.
The third part of the paper is devoted to a
discussion of the applications of the theory of
the structure of the atom. It is shown that
the theory can be used to calculate the
properties of the atom and to predict the
results of experiments.
